Renters Insurance

What is Renters Insurance?

Renters Insurance is an insurance policy written in your name designed to protect you from damage you may cause while flying an aircraft you don't own. Damage could be to the aircraft itself, but it could also be to other property or person that you may fly or taxi into.

What Does It Cover?

Renters Insurance will cover your Liability and Physical damage, but also the Loss of Use. Additional coverages include Baggage and Hangar coverage, Medical coverage, and Personal Liability. Don't assume a flight school you're renting from will automatically provide these coverages for you. In fact their policy is designed to protect them.

Frequently Asked Questions?

Proof of coverages is immediately available, but the policy will be emailed in 1-7 days.

If you need to change your policy please email our office <mail@aviation-marine.com> and someone will help you.

Monthly policies are available in the StarrGate selection next to the Platinum Package.

Ask your flight school what minimum requirements they have.

Cancelations are available up to 50% of the premium paid.
